Cognitec develops market-leading face recognition technologies and applications for enterprise and government customers around the world. In various independent evaluation tests, our FaceVACS® software has proven to be the premier technology available on the market.

Cognitec's portfolio includes products for facial database search, video screening and analytics, border control, ICAO compliant photo capturing and facial image quality assessment.

We offer innovative, easy-to-use, and customizable software products and ensure straightforward integration and deployment, mainly through "open-system" architecture and unparalleled technical support.

Around the globe, other companies have developed and continue to create new solutions using our technology—a resounding testament to the technical proficiency and customer-friendliness of our products.

Moreover, Cognitec's best-in-class biometric recognition accuracy and speed continue to solidify our already robust technical prowess and worldwide customer satisfaction.
